(54) Title: DISK CARTRIDGE AND STORAGE ASSEMBLY

(57) Abstract: A disk cartridge and storage assembly comprises an optical disk and a housing (2) in which the disk is rotatably accommodated. The housing is adapted to be inserted into a disk drive together with the disk. The cartridge comprises at least a first coupling member (5) on the housing. The assembly is provided with a link element (6) to couple the cartridge to a storage support. A second coupling member (9) is provided on the link element and is adapted to be removably coupled to the first coupling member. In this way it is possible to store or transport one or more disk cartridges in a convenient manner.
